

SUTCO® SORTING AND TREATMENT PLANTS .

PRE-SORTING FACILITIES BEFORE THERMAL TREATMENT

**ALL FROM ONE HAND -
FROM CONCEPT TO THE COMMISSIONING.**

PRE-SORTING FACILITY.

PRE-SORTING FACILITY BEFORE THERMAL TREATMENT

During the delivery of the waste and the pre-treatment of domestic waste the pre-sorting meets the special requirements for control, pre-sorting, crushing and homogenization. The industrial and household waste and specific to the products as well as the bulky waste are correspondingly treated prior to a charge into the waste bunker.

The Sutco plant ensures a uniform utilization and working temperature by feeding a constant input. Among others, this optimizes the incineration process, lowers peaks of harmful substances in the flue gas and reduces process faults caused by hot/cold furnaces. A clean solution.

SOME REFERENCES

PRE-SORTING FACILITY BEFORE THERMAL TREATMENT

RESIDUAL MATERIAL TREATMENT IN DISTRICT WASTE POWER STATION, LINZ

Location	Linz, Austria
Plant	Treatment of the waste fuels from the MBT, industrial waste, household waste and bulky waste.
Throughput	225,000 Mg/a
Customer	Linz Strom AG, Austria

PRE-TREATMENT PLANT HULL

Location	Hull, United Kingdom
Plant	Mechanical treatment of RDF, sort out of impurities
Throughput	278,000 Mg/a
Customer	M+W Group, United Kingdom

PRE-SORTING SOLUCUM

Location	Leudelange, Luxembourg
Plant	Mechanical pre-treatment
Throughput	20,000 Mg/a
Customer	Solucom, Luxembourg
